MEASUREMENT PROCESSES DIGITALIZATION

Our Differentiated Services

Measurement Processes Digitalization

We develop and implement solutions that allow collection, validation, analysis, and reporting of raw flow data coming from the operational field. By using advanced algorithms and procedures we assure an error-free and structured metering data base.

Measurement Management Application Design

Develop of Measurement, Analysis and Reporting processes.

Communication Networks

Automation and business networks integration by specific communication protocols and network architectures.

Database Architecture

Measurement data integration, synchronization and storing.

Application and Information Integration

Seamless and trouble-free with SCADA and process historian, BI Systems and others.

Data Security

Encryption and Secure Communication
Access Control and Authentication, Regular Audits and Monitoring.

Cloud Integration

Scalability and Flexibility, Centralized Data Management, APIs and Interoperability.

Measurement Data Management

Integral and total management of measurement

FIELD DATA COLLECTION

Raw
Database

DATA VALIDATION

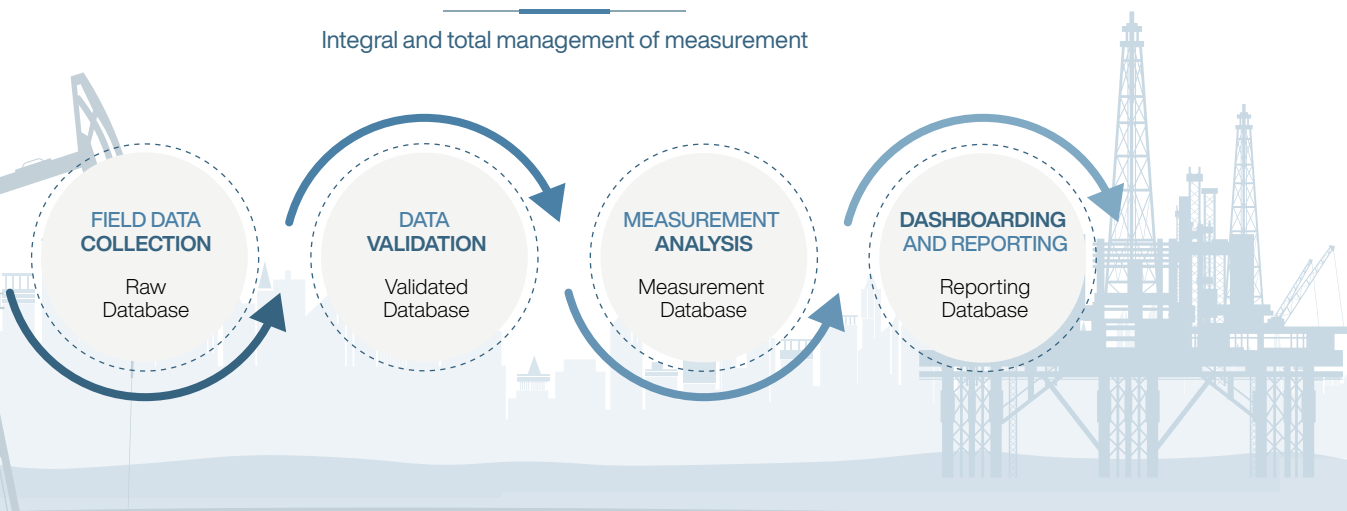

Validated
Database

MEASUREMENT ANALYSIS

Database

Principles of Functioning

Field measurement equipment

(Flow computers, flow meters, analyzers, multiphase meters)

FocQus Solution

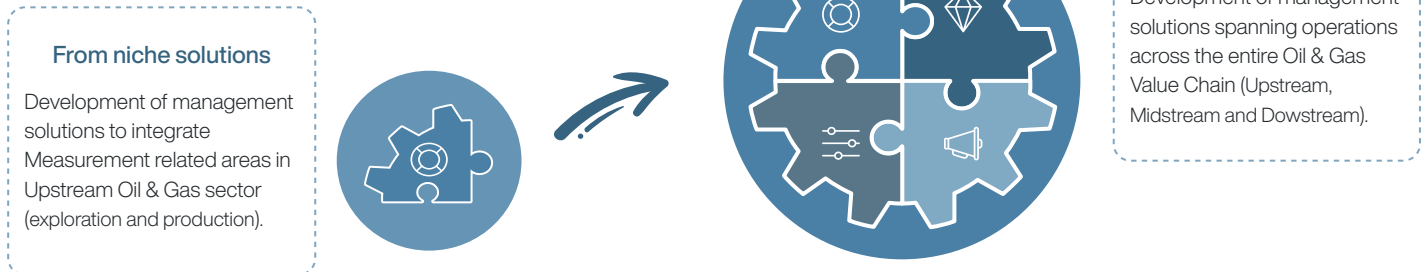

Note 1: Modbus (TCP/IP, RTU, Enron), ROC, TotalFlow, OPC, HTTPS, MQTT, API Rest, etc

Applications Integrations

We integrate the metering database with different data client applications in order to give accuracy and traceability to processing executed in another operational and/or supporting areas. We develop integrations applications for using through the entire business value chain of our clients.

Oil & Gas Integrated Solutions

Tailor-made client solutions

Technical Support

People supporting people

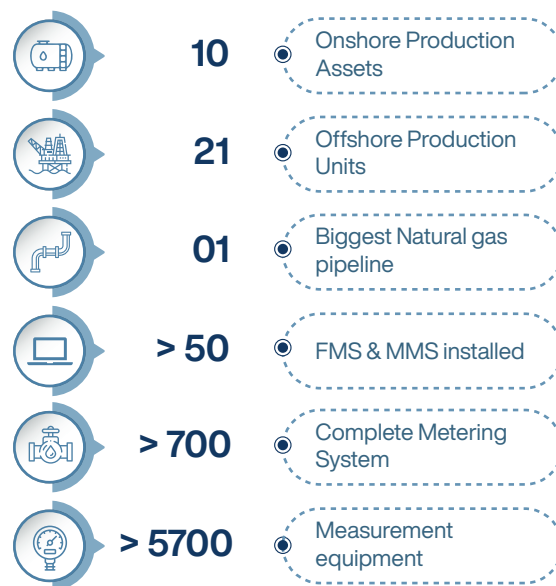

We are organized to attending support requirements for our solutions all the time. 24/7 supporting time is available to guarantee 100% uptimes and prevent downtimes in advance.

Where are our solutions installed?

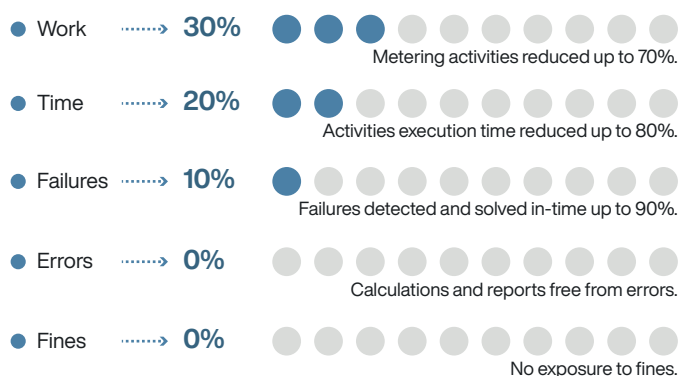

Main location and clients

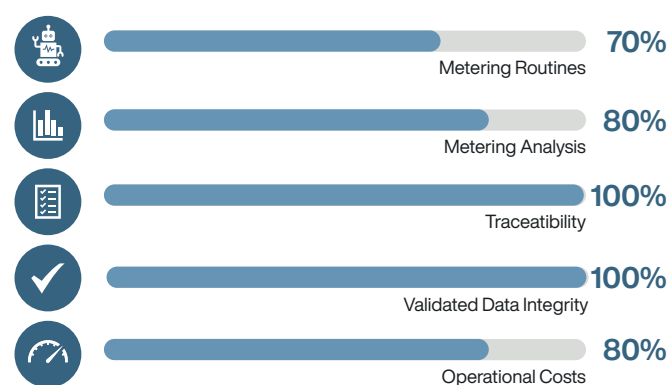

OUR RESULTS

What we are proud of

Reduction

Optimization
